# TABLE OF CONTENTS:

- 1.) Introduction
- 2.) Make Money With No Products of Your Own
- 3.) What is a Niche Market?
- 4.) The top 7 Profitable Niche Categories for Making Money Online
- 5.) The **659 Profitable Niche Markets**

## 1.) INTRODUCTION

Just a quick introduction before we get started. I am [Bradley Morgan](#), author of **PURR Passive Income Power™**. That is my 350 page book available [from Amazon](#) (eBook or hard copy). You can also get the eBook directly [from my website](#).

**PURR = Persist, Understand, Refine, Repeat!**

## 2.) HOW TO MAKE MONEY WITH NO PRODUCTS OF YOUR OWN TO SELL

Making money online without having products of your own to sell is referred to as **affiliate marketing**. This approach to making money online is relatively quick & easy compared to creating or sourcing your own products.

With affiliate marketing, you use special affiliate links to refer people to merchant websites. When your referral buys something there, you earn a commission.

Sounds easy, but like all worthwhile things in life, there are a few things you need to learn.

I believe Wealthy Affiliate is the best place to learn those things.

[Click here](#) if you have not yet joined Wealthy Affiliate for free. If you have, then be sure to give the free Starter training a good try. Then, seriously consider upgrading to Premium.

For a **behind the scenes look at Premium**, [click here](#) to see the video that normally only new premium members get to see. You will also get to know Kyle, one of the owners of WA that does much of the training inside WA.

For me, Wealthy Affiliate Premium is so valuable that I consider it just a cost of doing business. The cost is far less than my monthly affiliate income. I love all that WA has to offer.

What I like best is that Premium members enjoy double commissions compared to Starter members when promoting Wealthy Affiliate, and the commissions recur monthly. That would apply to you if you choose a niche related to the promotion of Wealthy Affiliate.

If you go that way, they have a dedicated training series called The Affiliate Bootcamp:

*"The Affiliate Bootcamp training is a 7 Phase (70 lesson) series of courses walking you through the process of creating and establishing a business in a niche related to the promotion of Wealthy Affiliate."*

Of course if you choose a niche that is not related to Wealthy Affiliate, that is what the

bulk of their training is all about. For example, they have classrooms on these topics:

- **Authoring & Writing Content**
- **Email Marketing**
- **Search Engine Optimization**
- **Everything Wordpress**
- **Social Engagement & Marketing**
- **Website Development & Programming**
- **The Wealthy Affiliate Platform**
- **Keyword, Niche and Market Research**
- **Video Marketing**
- **Pay Per Click Marketing**
- **Local Marketing**

Each classroom contains relevant courses, videos, tutorials and webinars.

Of course you could choose 2 niches, one related to promoting Wealthy Affiliate, and one that isn't. In that case you can make good use

of both training paths inside WA Premium (but best to focus on just one to start with).

*So, as you can see, if you think the time is right to invest in yourself and your future, **Wealthy Affiliate Premium** is a good way to do that!*

### 3.) WHAT IS A NICHE MARKET?

Success in [affiliate marketing](#) is strongly tied to picking a profitable niche market to focus on. A niche market is nothing more than a group of people interested in a particular thing.

A niche market exists for just about anything you can imagine. You yourself belong to many

niche markets related to everything you are interested in at this point in your life.

Find a niche market that you feel motivated to serve, and you are in business.

The **659 Profitable Niche Markets** listed below can be used as a brainstorming tool to do just that.

## 4.) The 7 Profitable Niche Categories

The **659 niche markets** listed later in this book are organized into 7 categories. These categories are time-tested and proven to be profitable.

It can be helpful to think in terms of the category that would be the best fit for you, before picking an actual niche market to enter. This will help you to narrow down your choices when reviewing the full list of 659.

Some niche markets could fit into more than one category. In those cases I tried to pick the one that is the most dominant aspect of the market.

If you prefer to explore a different angle to a niche, feel free to do so. The goal of the categories and list is to spark your inner creativity and lateral thinking processes.

Keep in mind that you don't need to be an expert in the niche. You can research and learn more about the topics that interest you.

Here is a summary of the 7 niche categories:

- 1. Money** - This is an extremely profitable niche category. It includes everything from making money, to managing money, to insuring against losses. Anything that can have an impact on a person's financial situation is sure to have a hungry crowd searching for solutions.

These niches tend to have some of the highest paying affiliate programs around. My most profitable blog of all time was in an investing niche.

**2. Health** - Everyone in the world struggles with health issues. If you think you can help them out, this may be the niche category for you. The number of affiliate products you can promote in the health niche is staggering. Repeat business is almost a given.

Why is it a given? When is the last time you heard of somebody actually sticking with a particular fitness program or diet for life? This almost never happens. People are always looking for the next best way to solve their health issues.

It doesn't mean the first diet wasn't good. It just means they couldn't stick with it and want to try the next one. There will also be different products you can create or promote as an affiliate to help people stick

with a particular diet, like specialty recipe books to keep them on track.

For conditions like arthritis there are many products that can help ease the pain. Very good products can work well for some people and not others. Results vary from person to person.

People understand this and are likely to try more than one solution until they find what works for them. You can help people understand what their options are. When people have a problem like that, not searching for a solution is not an option. As a result, there is plenty of internet traffic in these niche markets every single day.

**3. Hobbies-** People spend a ton of money on their hobbies. They do it because it is **fun**. However, a better word for committed hobbyists may be **obsessed**. There is almost no limit to what they would consider spending to support their hobby.

A hobby can be defined as anything people enjoy doing in their spare time. It can also be defined as the things people do that make their lives worth living. The upcoming list of 659 includes lots of examples. The ones that interest you could very well be a great niche market for you to get into.

Success Story #4 in [PURR](#) is about a guy with a 4 child family that worked on his

woodworking niche site on the side for one year, then quit his job to do it full time.

That success story outlines the 8 different streams of income that he is deriving from his woodworking site. His most profitable income stream has nothing to do with affiliate marketing or creating his own products. This is a great real life story to expand your vision of what is possible.

- 4. Relationships** - What is the one thing that can destroy your enthusiasm for your hobbies, or anything else for that matter? That's right, if there is a problem with your relationships, or if you feel a void from the lack of a certain kind of relationship, nothing else seems to matter. The relationship niche category may well be the hungriest crowd of all.

There are many great products you can promote in these niche markets that can truly help people solve these kinds of issues. People need help with these things.

If you have gone through relationship pain in the past, and can speak with the voice of experience, these niche markets could be the right place to focus your efforts.

*Turn your mess into your message!*

- 5. How To** - The categories listed so far have plenty of opportunity to use a "how to" approach. Like how to fix a relationship, or make money, or solve a health problem, or pursue a hobby. So there can be some overlap between these niche categories.

I am listing **how to** as a separate category to catch niche markets like how to manage your time or learn a language. There are a lot of them, as you will soon see. Any market that involves learning of some kind can be monetized with information products, and in many cases physical products as well.

- 6. Products and Services** - All of the earlier niche categories can of course be monetized by promoting all kinds of products and services. However, there are many products and services that can be treated as a niche unto themselves.

This can be a very profitable approach because your target audience is much closer to the purchase decision. By visiting your site they are self-identifying

as already being interested in a particular product. You just need to help them understand which one would be the best fit for their needs.

For example, you could create a niche website or blog that specializes in baby strollers. Review the pros and cons of the various baby strollers on the market and you are in business. Join the Amazon Associates affiliate program and you can earn a commission on each and every one of them.

- 7. Business to Business** - People in business spend money because it is their job to spend money (aka the purchasing department). Instead of buying one of

something, they often need to buy many of the same thing.

For example, my office furniture affiliate site once got credit for a large order of office chair headrests that totaled over \$1000. This is an often over-looked angle in niche marketing circles.

I have included a few niche ideas in this category just to get you thinking about it. If you have experience in a particular business area, the business to business niche markets could be a good fit for you.

**[Click here](#) to learn how to make money with these niche categories**
